## HATHAWAYS POND CONSERVATION AREA

**DIRECTIONS:** From the intersection of Rt. 132 and Phinneys Lane, go north on Phinneys Lane heading toward Rt. 6A. The entrance is 3/10 mile on the left. The entrance road will lead you into a parking area for the town beach. The trailhead is near the bathhouse. You will need a beach sticker or to pay a daily beach fee for parking to hike the trails mid-June to mid-August.

**SITE DESCRIPTION:** The Hathaways Pond Conservation Area's 94 acres are part of the Sandwich glacial moraine deposits. Its hilly terrain makes it a little more of a challenging hike. The trail loops around the pond, providing beautiful vistas. There is an interpretive trail highlighting the formation of the site during the glacial period over 15,000 years ago. Hiking, mountain biking and fishing are welcome as are picnicking and swimming at the Town beach. Hunting is permitted subject to current rules and regulations. Check the kiosk at the trailhead for additional information.
